User Manual: Conversational English Serious Game
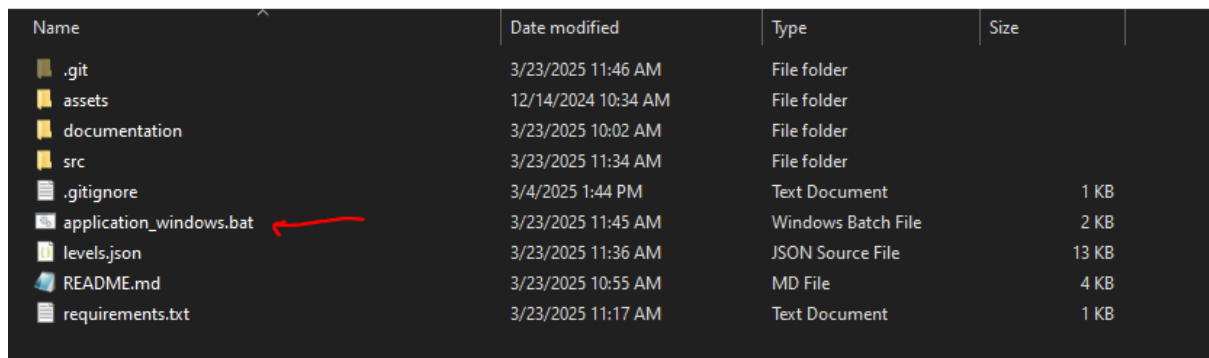

Table of Contents

1. Installation

Follow these steps to install the Conversational English Serious Game:

1. Download the compressed file from Google Drive (using the provided link).
2. Once downloaded, locate the file in your downloads folder.
3. Right-click on the file and select "Extract all..." or use a decompression program like WinRAR or 7-Zip.
4. Choose the location where you want to extract the files and confirm.
5. After extraction, navigate to the created folder.
6. Locate the file with .bat extension and double-click to run the application (see screenshot).

Important note: Windows may display a security warning. This is normal for unsigned applications. If you trust the source, you can proceed with execution.

2. Getting Started

When starting the application for the first time:

1. The main menu will be displayed where you can select different options.
2. To start playing, select "Play Level".

3. If it's your first time using the application, you may need to create a new level by selecting "Creation of New Level". The application has 2 default levels, but they may not be suitable for you.

3. Main Functions

Main Menu

From here you can access all the game functions:

- Play level
- Create new level
- Modify questions
- Exit game

Create New Level

This function allows educators or content creators to develop new learning levels:

1. Select "Creation of New Level" in the main menu.
2. Assign a name to the level.
3. Add questions and answers for the level. Each question must have a question, three possible answers (one correct and two incorrect), and optionally can have 1 image and an audio file.
4. Save the level for later use.

Modify Questions

The application offers several options for managing questions:

- Select a question from a specific level
- Modify existing questions to improve their content, such as the answers, question, correct solution, add/change the image and audio.

Play

To start practicing conversational English:

1. Select "Load Level" in the main menu.
2. Choose the level you want to play.
3. Follow the on-screen instructions to answer the questions.
4. When finished, you will see a completion screen with your score.

4. Troubleshooting

The application doesn't start

- Make sure the .bat file is in the same folder as the other extracted files.
- Try running the file as administrator (right click → Run as administrator).

Display problems

- Adjust your screen resolution.
- Make sure all files in the "assets" folder are correctly extracted.

Error Messages

If a warning message appears (popup for warning):

- Read the message carefully, as it provides information about the specific problem.
- Follow the instructions to resolve the issue.
